ABOUT

I'm Bikila Ketema, a final-year Business Administration and Information systems student at Addis Ababa University, School of commerce, passionate about blending technology with business. Throughout my studies, I've learned how to make businesses tick, from managing teams to understanding finances. I'm also pretty handy with technology, having dabbled in creating websites and programming in languages like C++, Java, and JavaScript.

Recently, I finished a year-long Software Engineering program at ALX (Holberton School), where I delved into making websites and apps from scratch. This experience boosted my skills in bringing together tech solutions and business needs. I thrive in team projects, paying close attention to detail and always striving for excellence.

WORK EXPERIENCE

WEB DEVELOPER || INTERNSHIP
Jan 2024 – Apr 2024
The spark valley
Refactored their existing website to integrate new features and developed an admin panel for them.
